## Where Innovation Meets Performance

NIKA's Enterprise Technologies Group designs and deploys cutting-edge facility-related technology that excites and inspires, opening up possibilities and showing you the promise of a better tomorrow.

NIKA's innovative solutions help government manage energy consumption, equipment, infrastructure, and resources at facilities around the globe. Agencies and organizations with large real estate portfolios rely on NIKA to provide comprehensive services specifically designed to improve the efficiency, life span and security of their complex facilities.

Our expert staff specializes in facility-related performance analytics, building control system infrastructure, and software development and customization. These tailored solutions help you improve data collection tactics, facilitate or enforce business processes, develop effective analytics, or commission a new website or application.

NIKA understands the intricacies, design challenges, and security issues surrounding today's facility technology, which is why we are particularly adept at solving real issues with real solutions that include:

- ◇ Database Design, Management and Integration
- ◇ Facility Analytics, Business Intelligence and Custom Reporting
- ◇ Agile Software Development
- ◇ Mobile Application Design and Development
- ◇ Building Control System Cybersecurity Risk Management

Our experts have unique and proven experience with the top facility-related technologies, including Real Property Installed Equipment (RPIE) tagging, DMLSS, BUILDER, PAVER, ROOFER and more.

For years, NIKA has been ahead of the curve, helping governments and industry recognize efficiencies, reduce operating costs, and improve performance. Whether you need an off-the-shelf solution or one that is entirely customized for your unique facility portfolio, NIKA can show you exciting new possibilities.
