Capabilities Overview

Where Depth Meets Reach

Enjoy the best of both worlds: A locally-owned and operated business with extensive reach and capability.

NIKA is revolutionizing how businesses and governments design, build and manage real property. By combining architecture, engineering, enterprise technology, and facilities operations management services all under one roof, we are able to provide a significant value-add to our clients.

Geographic Reach

3 Offices

45 States

29 Countries

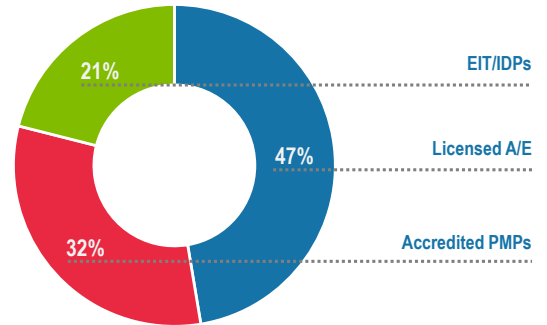

NIKA works coast-to-coast and around the globe. We have done work in 45 states and 29 countries and has offices in Rockville, MD, San Antonio, TX, and Milan, Italy.

Bench Strength

NIKA is 205 employees strong, with over 75 A/E specialists. Nearly 100 employees live in the DC region and the remaining are stationed around the globe.

Studio Demographics

NIKA employs only the best. 47% of our employees are licensed architecture and engineering specialists and 32% are accredited project management professionals.

NIKA Service Lines and Core Services

NIKA has developed a platform of integrated services that help clients achieve success. These service lines – **Architecture and Engineering, Enterprise Technologies and Facilities Operations Management** – work together for a complete solution.

NIKA specializes in the planning, designing, building, engineering, management, support, and maintenance of complex facilities and infrastructures. Governments and businesses turn to NIKa for specialized expertise in: Medical & Healthcare Facilities, Laboratories, Research & Design Studios, Complex & Secure Facilities, and Sensitive Compartmentalized Information Facilities (SCIF).

Architecture and Engineering

- Architecture
- Master Planning
- Interior Design
- Mechanical, Electrical and Plumbing Engineering (MEP)
- Fire Protection Engineering
- Physical Security Design

Facilities Operations Management

- Project and Program Management
- Initial Outfitting and Transition (IO&T)
- Facility Personnel/Staffing and Augmentation
- BUILDER Assessment
- Real Property Installed Equipment (RPIE) Asset Tagging and Management Services

- Medical Facility Real Property Planning and Analysis System (RPLANS)
- Joint Commission & HIPAA Compliance

Enterprise Technologies

- Database Design, Management and Integration
- Facility Analytics, Business Intelligence and Custom Reporting
- Agile Software Development
- Mobile Application Design and Development
- Building Control System Cybersecurity Risk Management

With our diverse portfolio of service offerings, large pool of talented professionals, and an established record of success, NIKa is the total solution for governments and commercial businesses.

The NIKA Advantage **Understanding the Bigger Picture**

With integrated services and a large pool of industry experts, there are seven great reasons why government and industry clients choose NIKA.

Excellence in Project Management

NIKA supports you through the entire project lifecycle with project development support, onsite coordination of contractors, verification of contractor-installed items, coordination with contracting officers, QA/QC, and enterprise technology. We provide project managers, quality assurance managers, and technical managers to facilities around the globe.

Budget and Schedule Driven

In a fiscally-constrained environment, it's important to stay on schedule and on budget. We establish budgets early in the design phase, build a team we trust, and focus on project options that have the most significant cost impact. Most importantly, we deliver projects on time and to expectations.

Certified Thought Leaders

At NIKA, we take knowledge seriously. We hire the best and brightest experts in every area of the firm. Whether you need a LEED-accredited architect, a licensed engineer, a certified project manager, or a skilled fire protection expert, we have the professional expertise to get the job done.

Deep Expertise, Extensive Capabilities

What sets NIKA apart from other architecture and engineering firms is our extensive reach and diverse capabilities. We offer a wide range of ancillary services that complement each other in order to form a more complete solution that addresses more of your needs.

Multiple Disciplines Under One Roof

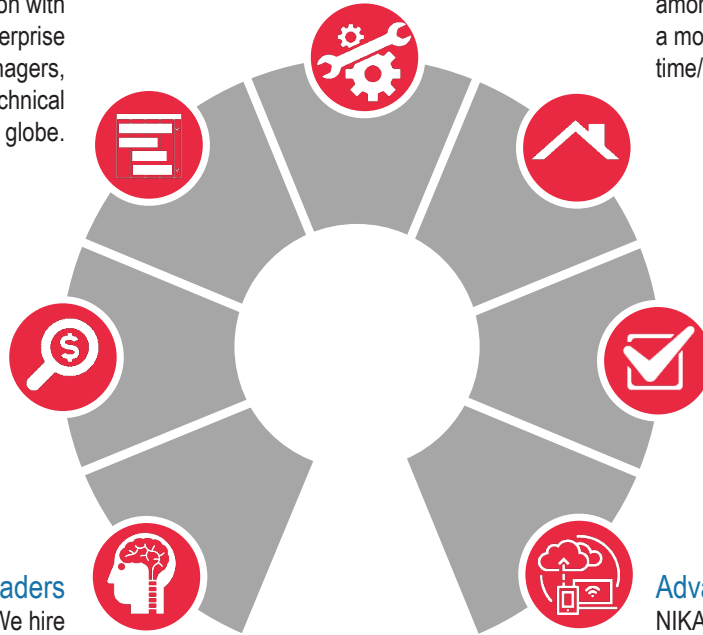

Unlike most A/E firms, NIKA maintains a wide range of experts working on staff at the same location. This guarantees strong collaboration among our multi-disciplinary teams, resulting in a more comprehensive work product, as well as time/cost savings for our clients.

Commitment to Quality Assurance and Control

Quality assurance and control is more than just a promise at NIKA. We build QC into every aspect of a project, documenting all meetings and putting controls in place for every deliverable we complete. Multiple levels of review ensure that work is completed in a manner that exceeds client expectations.

Advanced Technologies

NIKA is revolutionizing the way we approach the design and building process, leveraging state-of-the-art technology (e.g., Revit/BIM) and proven quality assurance and control processes to provide greater reliability, efficiency, and value for our clients.

Clients Working Together

NIKA has a significant portfolio of past performance working with all levels of government and industries.
